*Complete Laboratory and X-ray Service without extra cost to the patient.*

**RESIDENT PHYSICIANS IN ATTENDANCE  
AT ALL TIMES**

# DIGITALIS THERAPY DEMANDS UNIFORMITY

THE increasing use of the Lederle Tablets of Digitalis is an indication that physicians treating cardiac disturbances have found them uniform, stable and accurately standardized.

The Lederle Tablets of Digitalis were perfected as a result of six years' experience in the Cardiac Clinics of Greater New York with tablets of standardized digitalis leaf having a potency of 1 cat unit in  $1\frac{1}{2}$  grains of powdered leaf.

Only digitalis leaf which has been clinically demonstrated to possess *uniform activity*, is used in the preparation of the Lederle Digitalis Tablets.

The intravenous method of Hatcher and Brody used by the Lederle Laboratories directly measures the cardiac effects of the drug.

Since neither the intravenous Cat Method nor the official One Hour Frog Method measure the absorption of digitalis in man, the Lederle leaf is clinically tested in cardiac cases before any is used in the preparation of the Lederle Tablets.

The uniformity of the Lederle Tablets is maintained by a careful blending of the powdered leaf. When 10% of the original stock has been used, a like amount of carefully selected standardized leaf is added. Thus there can be at no time any appreciable variation in the clinical results. This is the method developed by the Cardiac Clinics of Greater New York which are controlled by the Heart Committee of the New York Tuberculosis and Health Association.

Digitalis Tablets Lederle are supplied in packages containing 100 tablets (5 tubes of 20), in three sizes:  $\frac{1}{2}$  Cat Unit ( $\frac{3}{4}$  grains\*) 1 Cat Unit ( $1\frac{1}{2}$  grains\*) 2 Cat Units (3 grains\*)

\*The comparison of the cat unit of digitalis to the grain of powdered digitalis leaf refers to the leaf selected as described above for the Lederle product; namely, that one and one-half grains of the powdered leaf assay one cat unit. In the above table, grains are stated only as an approximate guide to the physician who has heretofore based his dosage on weight or volume.

## ***Renewable Edges a Valuable Aid To Operating Technique***

That is the verdict of those now using Bard-Parker Renewable Edge scissors. The expense and often unsatisfactory results of regrinding are eliminated. Renewable edges are uniformly sharp and may be replaced at the small cost of 16 $\frac{2}{3}$  cents per pair. Bard-Parker scissors give you greater efficiency and economy for the same price you now pay for other stainless steel scissors. Furthermore, Bard-Parker scissors will last you far longer since they are not subject to grinding wear.

A  
Reliable Standard  
for Vitamins  
B<sub>1</sub>, B<sub>2</sub> or G

Vegex-Marmite is the original autolyzed extract from brewers' yeast.

Early found high in Funk's "vitamine"—B<sub>1</sub>—and then in vitamin G, or B<sub>2</sub>, Vegex became a dependable source of these vitamins in medical and nutritional centers.

More recently in the study of anemias, the "PA Factor", tentatively announced by Vaughan and Lond in The Lancet (London), July 8, 1933, was separated from Marmite-Vegex. Vegex furnished the vitamin B<sub>2</sub> used by Strauss and Castle, The Lancet (London), July 16, 1932, with gastric juice in their anemia research.

With both children and adults, the physician can depend on Vegex for vitamin B<sub>1</sub> and B<sub>2</sub> or G, just as on cod liver oil for vitamins A and D, and orange juice for vitamin C. The meat-like flavor of the Vegex paste—meat free—is very palatable and easily borne.

Constant feeding tests in our own laboratory, frequently checked by others, stand behind the high vitamin B<sub>1</sub> and B<sub>2</sub>, or G, potency of Vegex. These feeding tests not only include the amount necessary for recovery after depletion, but normal growth, reproduction and successful rearing of young.

*Sufficient samples for clinical use with "Vitamins" bringing  
this subject up to date sent to physicians  
and hospitals on request.*

## FOR CLINICAL USE YEAST VITAMINE-HARRIS (*Tablets*)

*When the entire  
yeast cells  
are desired*

**BREWERS'  
YEAST-  
HARRIS**  
(Powder)

Vitamine-B was discovered in the Yale Medical School Laboratories, by Drs. T. B. Osborne, Lafayette B. Mendel and associates. That same year, The Harris Laboratories were founded to manufacture Yeast Vitamine-Harris Tablets.

They were the first Yeast Vitamine-B Tablets made in America and still are the only *concentrated* Yeast Vitamine-B Tablet for clinical use.

There is still no other Vitamine-B Tablet of this concentration and potency.
